Career Objective: Seeking Data Analyst roles

Preferred Locations: Mumbai, Pune, Hyderabad

Education

Sigma Institute Of Engineering

Bachelor Of Engineering – Computer Engineering (8.4 cgpa).

Courses – IBM Academics, Code Unnati edunet Foundation (Advanced course , Value added course) , IBM cloud , Acme grade.

Work Experience

Intern @Crompton (Jan 2025-April 2025)

Data Analyst Intern - Working under the ongoing data analytics projects at Crompton.

Intern @mindsclik (July 2024-September 2024)

Software Developer Intern - Created interactive dashboards made on power bi and worked on python libraries in jupyter notebook for data analytics.

Intern @unifiedMentor (June 2024)

Software Developer Intern - Created interactive dashboards made on power bi and worked on python libraries in jupyter notebook for data analytics.

Projects

MES dashboard for Crompton (Django Project)

Made a Django based dashboard website for **Crompton** which has analytical charts and KPI for Crompton's MES data.

System Analytics Dashboard (PowerBi Project)

Created a PowerBi dashboard for system analytics consisting of device performance charts in the form of creative charts.

DocuPort (Full stack Project)

Created a website which can store your personal documents in it and can easily be fetched anytime, anywhere. Made using Django + React technologies.

Skills Summary

Languages: Python, Html, CSS, JavaScript, SQL

Tools: PyCharm, Google Collaboratory, Jupyter Notebook, PowerBI, MySQL, MsSQL

Soft Skills: Teamwork, Time Management, Decision Making, Critical Thinking.

Achievements/Participation

KIMO (Learn to Earn)

Got 8th rank in university in the KIMO competition.

Code Unnati Innovation Marathon

Participated in the National Code unnati innovation marathon and built a IOT based project on Smart Waste Management System.

Hackathon

Actively participated in a Hackathon arranged by ITM SLS university and made a supervised learning project on Fake News Detection System.

True News (Web Scraping Project)

Created a web scraping website which scrapes data from BBC and CNN websites and tells us that the user entered news is fake or true.

Green Destination Analysis (Python Project)

Data analytics project for **Unified Mentor** working on green destination dataset for insights. Also made creative visuals for representation.

Amazon Sales Analysis (Python Project)

Analysed amazon's dataset for sales insights and created visuals to represent the insights in a creative manner.
